

**AMERICAN REGENT®**

Reliable. Responsive. Respected.

Product Catalog

# We're proud to be an American manufacturer.

American Regent has a long history. From small beginnings in 1967 as a US-based manufacturer, the company has grown to be a leading pharmaceutical company in the United States. Our growing business is comprised of a mix of branded and generic injectables. For nearly 25 years, we have been the leader in IV iron therapy, supplying the market with the two top-selling brands in the US.

We are committed to setting a higher standard for responsiveness, reliability, and quality. We continue to make significant investments in expanding and modernizing our US-based manufacturing facilities. We have nearly doubled our capacity, created redundancies across our manufacturing sites, and strengthened our expertise in the development of complex drug products and delivery systems.

Speed counts. Flexibility matters. Quality and reliability are paramount. Because patients should never have to wait for the medications they need.

Taken together, excellence in these four areas looks like a flexible, fast-moving partner. One that is uniquely positioned to quickly respond to and help mitigate shortages or meet changes in market need. A partner committed to delivering essential medications now and well into the future.

Our legacy, spanning nearly 60 years, is built on an unwavering commitment to ensuring that the people we serve have the essential medicines they need.
